Subject: **Letter of Intent – Registrar Expression of Interest**

Dear Sirs,

This letter, attached to our expression of interest form, serves as confirmation of our interest in becoming an accredited .GH registrar.

Lexsynergy is one of the world's most accredited registrars, offering over 1,300 TLDs to customers worldwide. The company is headquartered in the UK with a supporting office in Johannesburg, South Africa. Founded by South Africans, Lexsynergy has a strong presence in Africa and our customer base includes large corporate clients and resellers globally. We are currently directly accredited in many African countries including Cote D'Ivoire, Burkina Faso, South Africa, Namibia, Kenya, Nigeria and Tanzania to list a few.

Our domain management portal (developed in-house by our developers) provides customers with the ability to fully manage their domains (register/transfer/update/manage DNS etc) and our service includes 24/7/365 email and telephone support services.

We have been offering .GH domain management since 2008 and currently manage over 650 .gh domains. We believe that direct accreditation will allow us to offer a more responsive service to customers, to grow the TLD's trust and demand as well as avoid previous issues encountered with the current .GH registrar due to manual processes.

We have a reseller program that will encourage more .GH registrations and expand its adoption.

We look forward to proceeding with this application and growing the .GH TLD both in numbers and reputation going forward.

Regards,

Elad Kinstler  
COO
